Corn Yields (Bu/a) in Wisconsin Since 1866

Years of Record Corn Yield and the Percent Increase Over the Previous Record Year

University of Wisconsin Corn Agronomy Program

Wisconsin Corn Performance Trials - Grain Summary

Location	1988-1997		1998		Percent Change
	N	Yield	N	Yield	
Arlington	1724	175	169	248	+42
Janesville	1724	171	169	208	+22
Lancaster	1724	155	169	224	+46
Fond du Lac	1532	151	145	195	+29
Galesville	1532	153	145	199	+30
Hancock	1532	176	144	221	+26
Chippewa Falls	1117	154	159	94	-39
Marshfield	957	129	159	159	+23
Seymour	889	144	159	157	+9
Valders	1241	138	159	192	+39
Ashland	110	127	19	139	+9
Spoooner	1807	118	210	145	+23
White Lake	570	83	70	113	+36

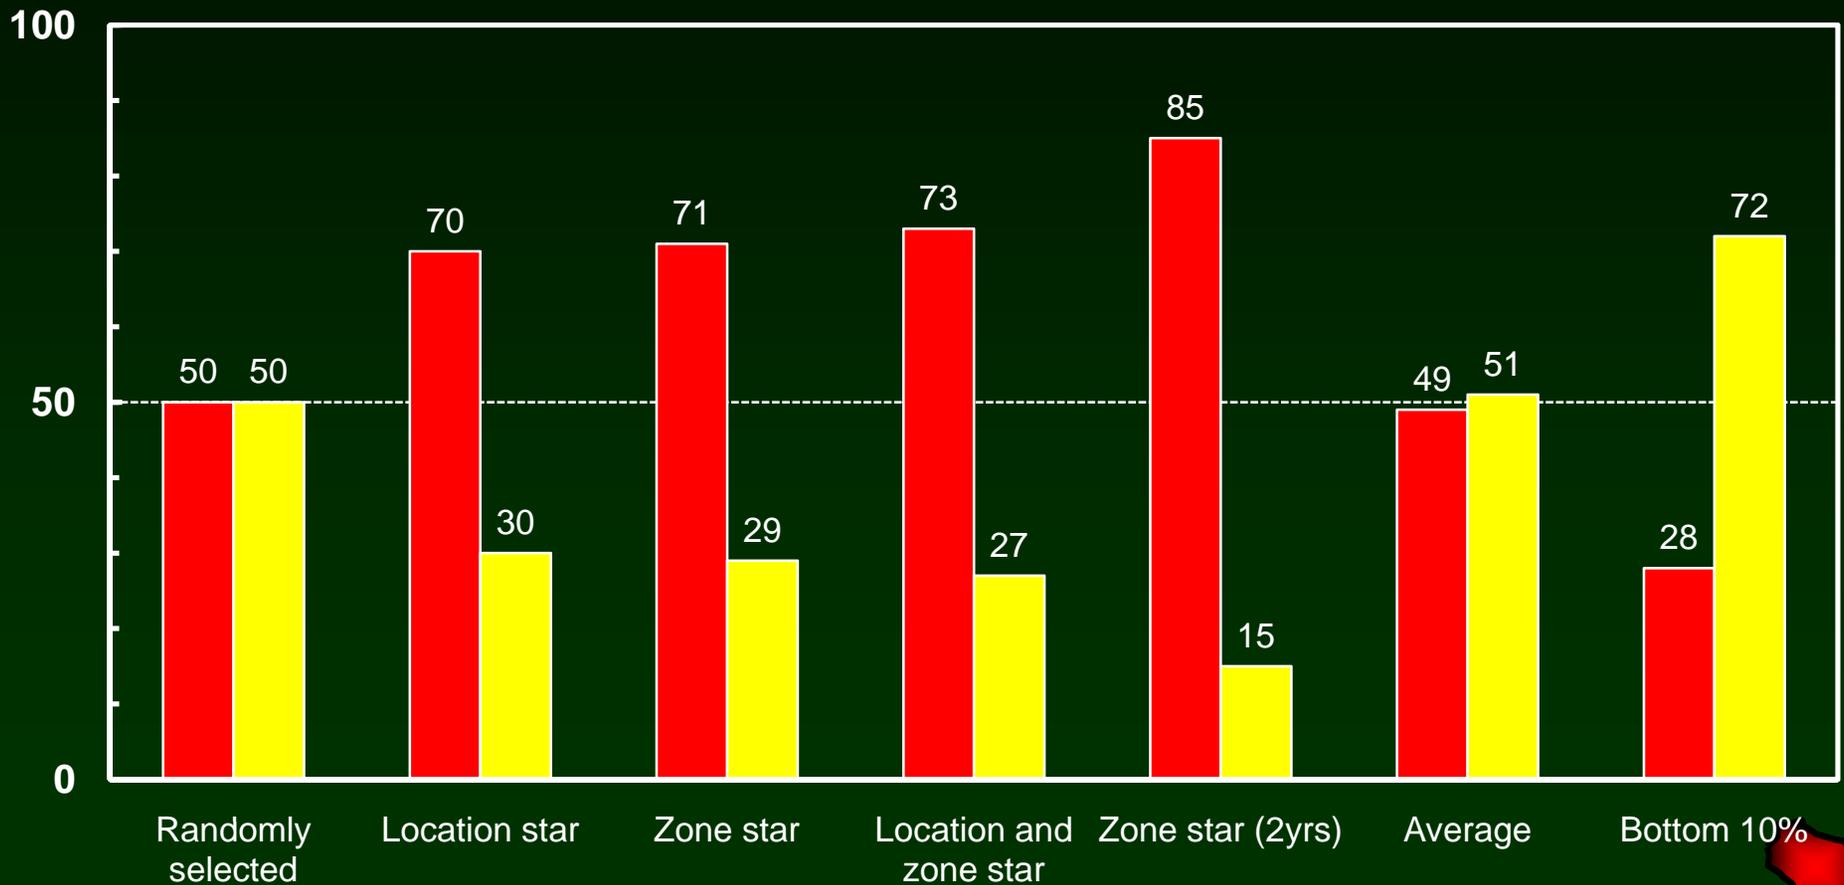

Note: Seymour average includes New London 1988-1992.

Picking Top Corn Hybrids Using Wisconsin Results 1977 to 1995

Frequency (%)

■ Above trial average ■ Below trial average

The Economic Consequences of Corn Hybrid Selection Schemes (1977 to 1995)

Selection scheme	Hybrids selected	Grain yield difference bu/A	Relative yield percent	Grower return difference \$/A
One location	Top 10%	6	4	14
Z & 3L	Top 10%	11	7	24
Z & 3L: 2 yrs	Top 10%	13	8	31
One location	Average	0	0	-1
One location	Bottom 10%	-9	-7	-21

Grower return difference = grower return of selected hybrids - trial average

Grower Return Over Time for Corn Hybrid Selection Schemes (1977 to 1995)

Selection scheme	Hybrids selected	Previous years		Selected year	Future years			
		-2	-1	0	1	2	3	4
dollars per acre difference								
One location	Top 10%	23	20	52	14	10	10	6
Z & 3L	Top 10%	38	37	51	24	23	14	18
Z & 3L: 2 yrs	Top 10%	44	48	50	31	25	15	21
One location	Average	11	9	0	-1	-2	-3	-4
One location	Bottom 10%	-5	-9	-60	-21	-20	-23	-23

Dollars per acre difference = grower return of selected hybrids - trial average

updated on 31 December 1998

Yield of "IMI" Hybrids in Relation to the Average of All Hybrids in a Wisconsin Trial

Yield of "BT" Hybrids in Relation to the Average of All Hybrids in a Wisconsin Trial

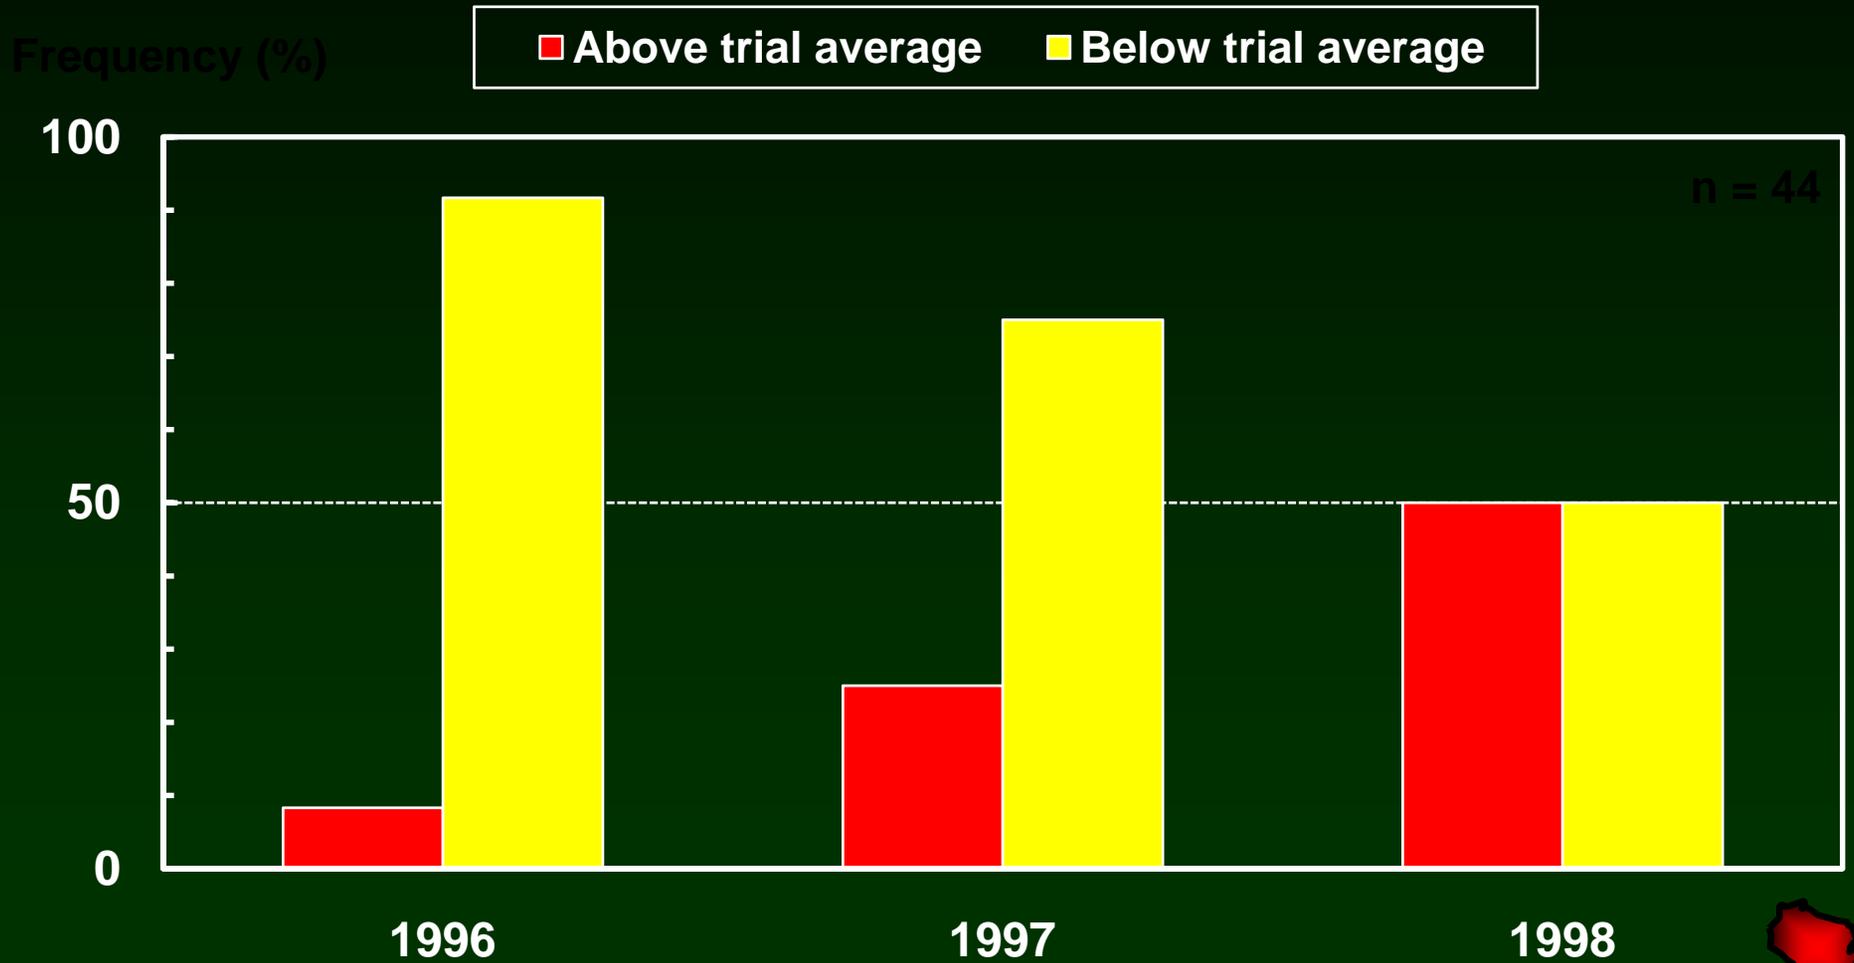

Bt corn registrations as of December, 1998

Company	Event	Protein	Brand	1 st ECB	2 nd ECB	Refugia
Novartis	176	CryIA(b)	Knockout / Maximizer	Yes	No	Suggested
Mycogen	176	CryIA(b)	NatureGard	Yes	No	Suggested
Monsanto	Bt11	CryIA(b)	YieldGard	Yes	Yes	Suggested
Monsanto	MON810	CryIA(b)	YieldGard *	Yes	Yes	Agreement 5% acres
DeKalb	DBT418	CryIA(c)	Bt-Xtra	Yes	Limited	5% acres
PGS/AgrEvo	CBH351	Cry9(c)	StarLink	Yes	Yes	5% acres

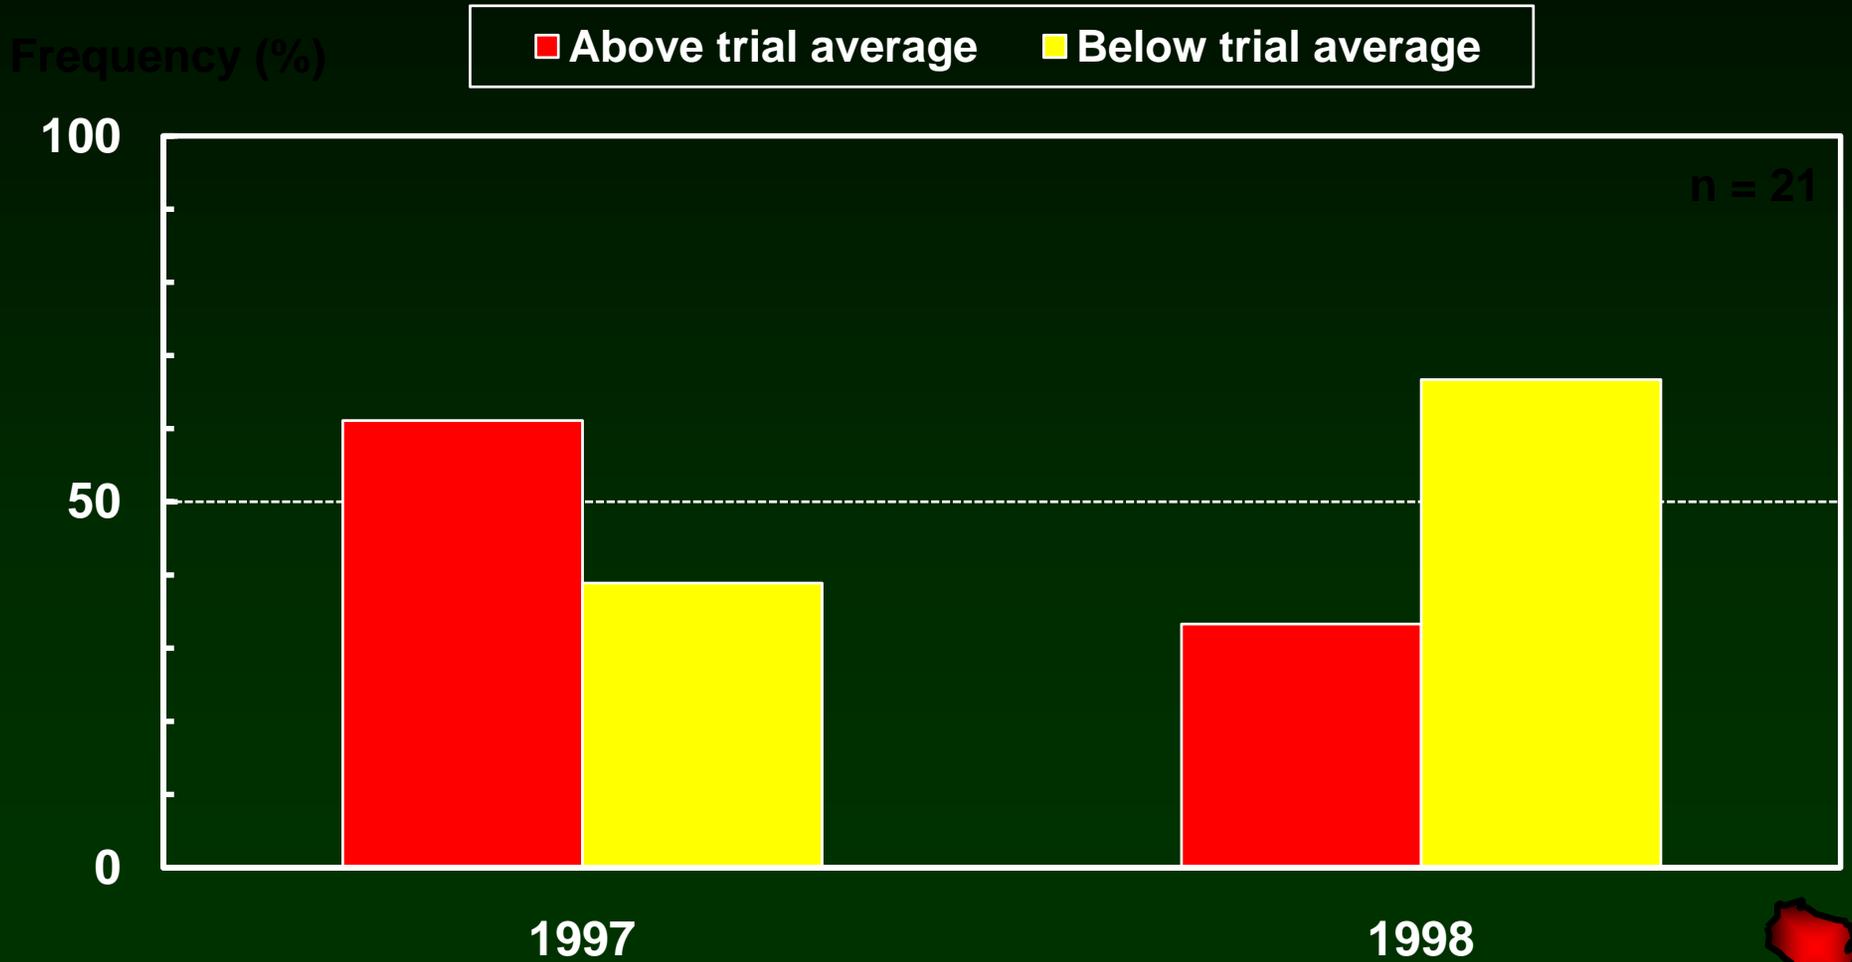

* Supplemental distributors: Cargill, DeKalb, Golden Harvest, ICI/Garst, Pioneer

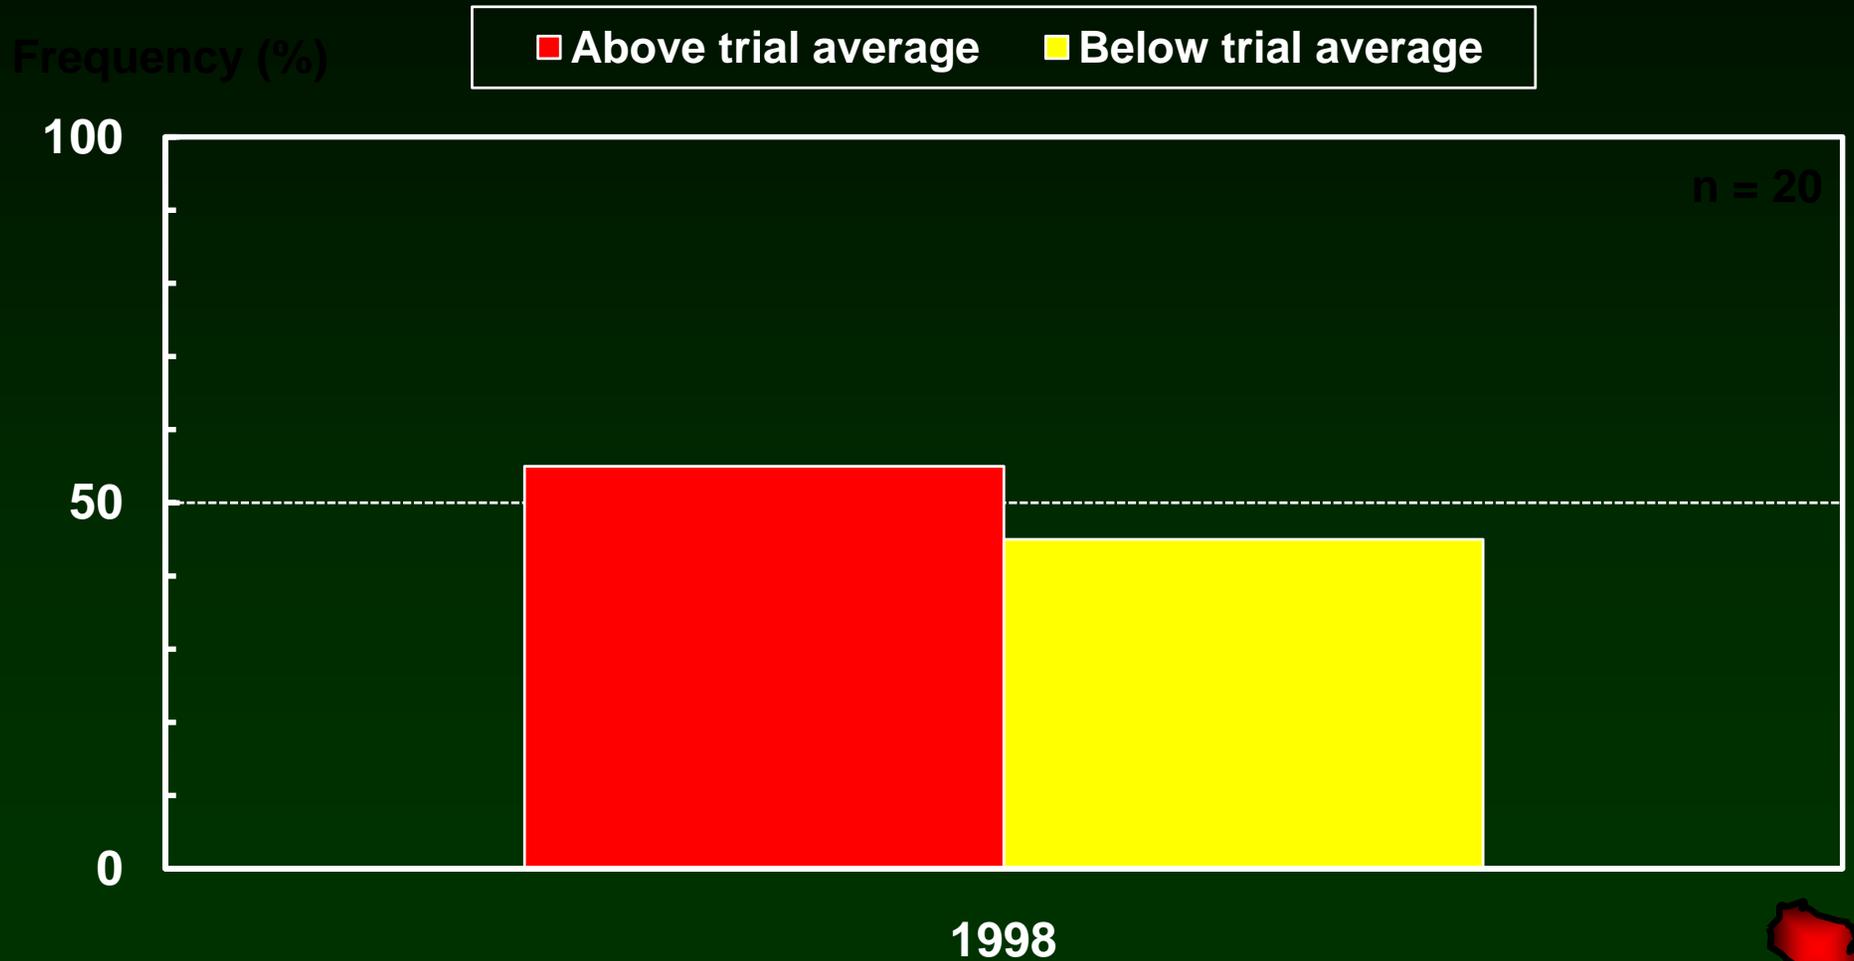

Yield of "SR" Hybrids in Relation to the Average of All Hybrids in a Wisconsin Trial

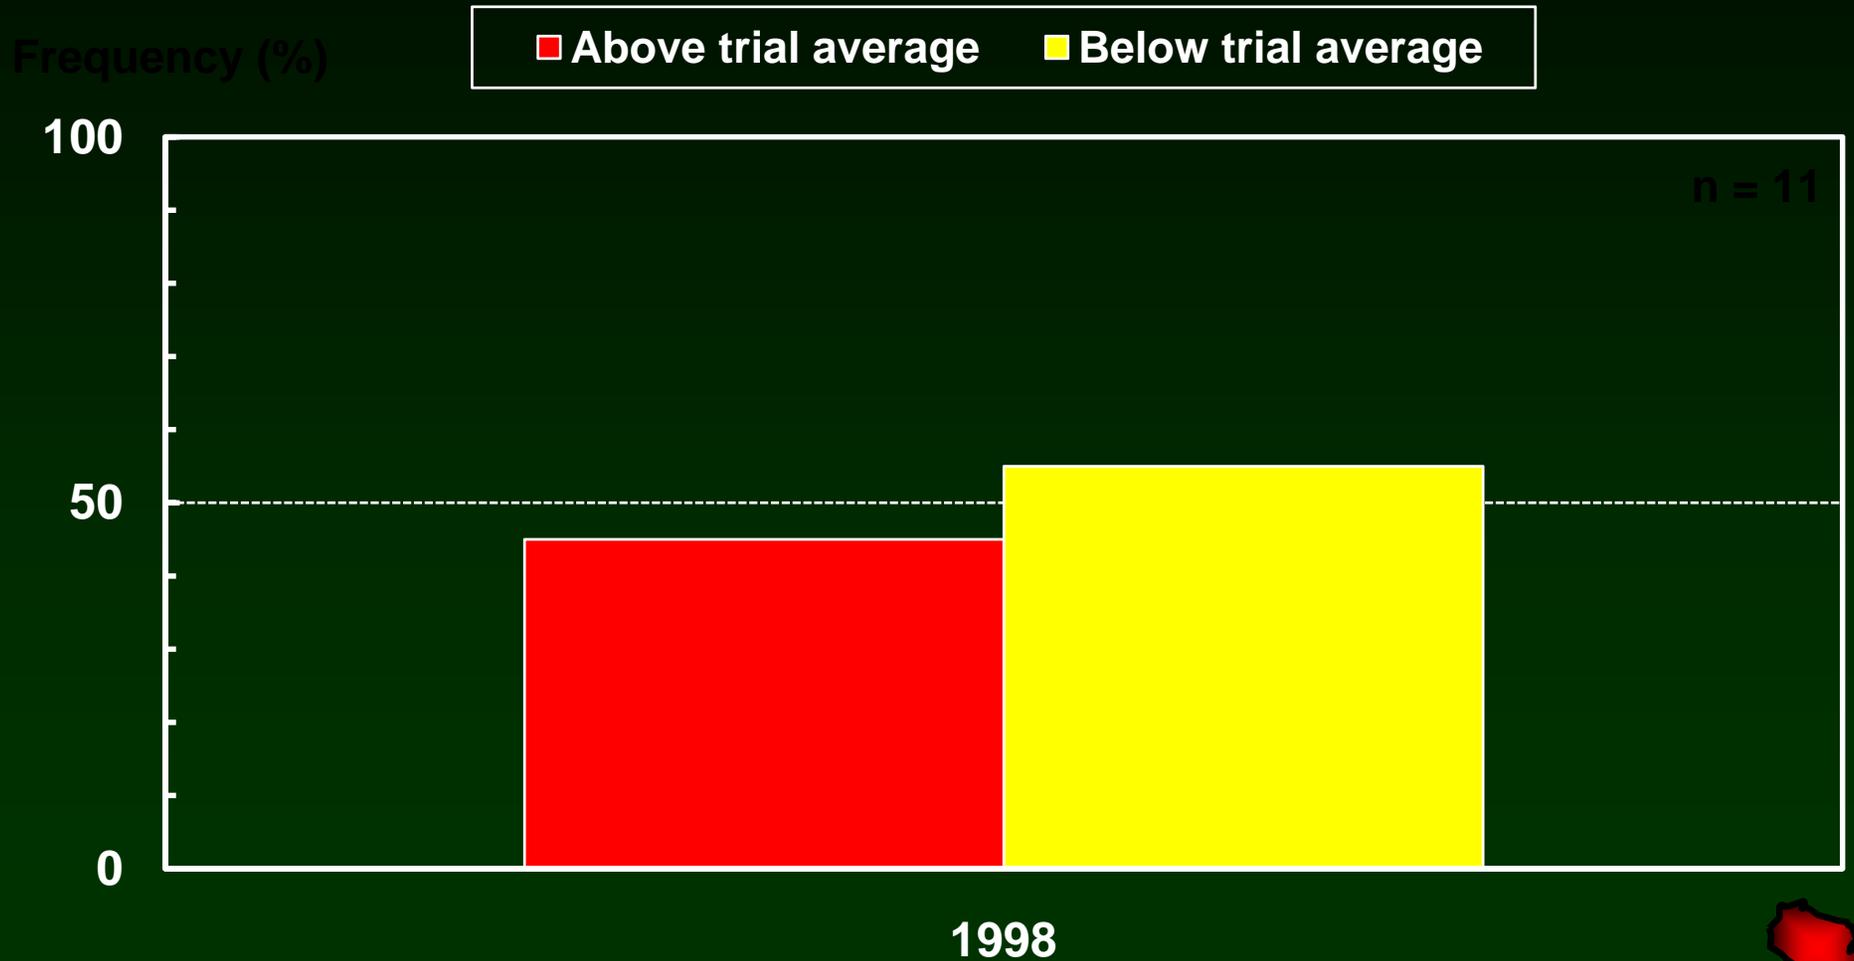

Yield of “Liberty Link” Hybrids in Relation to the Average of All Hybrids in a Wisconsin Trial

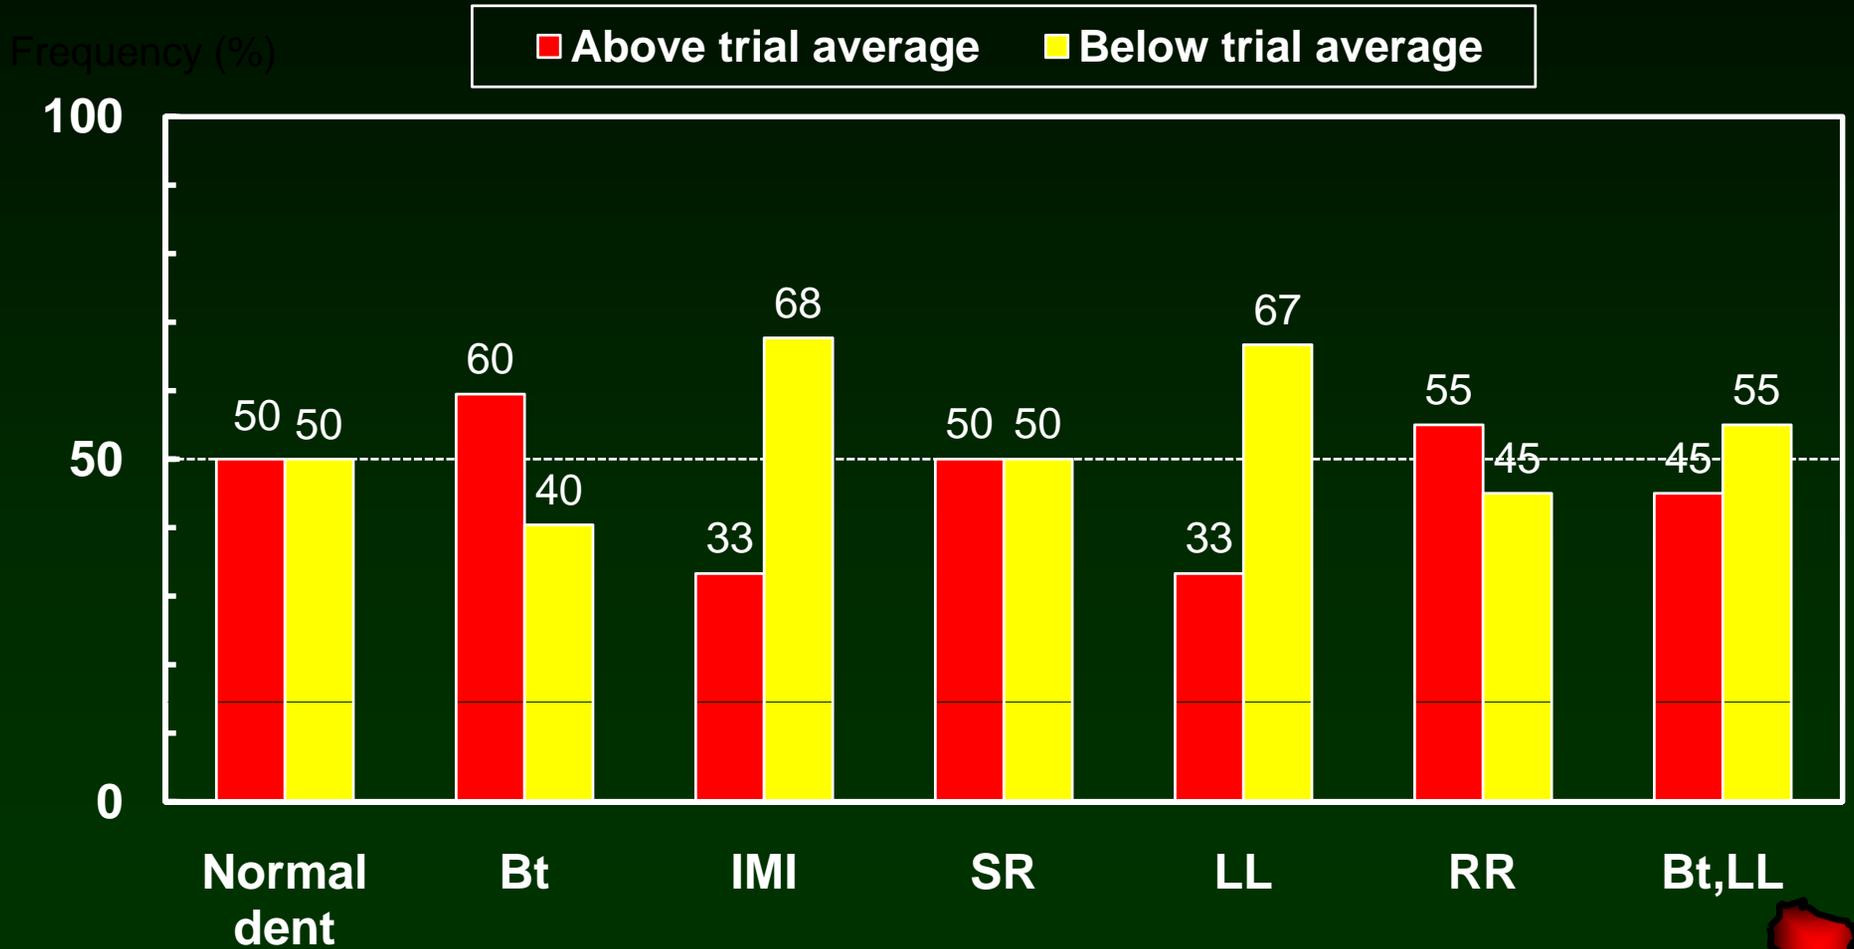

Yield of “Round-up Ready” Hybrids in Relation to the Average of All Hybrids in a Wisconsin Trial

Yield of "Gene Stacked" - (Bt,LL) Hybrids in Relation to the Average of All Hybrids in a Wisconsin Trial

Yield of Specialty Hybrids in Relation to the Average of All Hybrids in the 1998 Wisconsin Hybrid Trials

Using Wisconsin Corn Hybrid Performance Trial Results

- Use multi-environment average data
 - *Begin with trials in zone(s) nearest you*
 - *Compare hybrids with similar maturities*
 - *Use many years and locations*
- Evaluate consistency of performance
 - *Check performance in other zones and locations*
 - *Check other reliable unbiased trials*
 - *Be wary of inconsistent performance.*
- **SELECT** at <http://corn.agronomy.wisc.edu>

You are taking a tremendous gamble if basing your hybrid selection decisions on 1 or 2 local test plots

Hybrid Maturity Risk Management

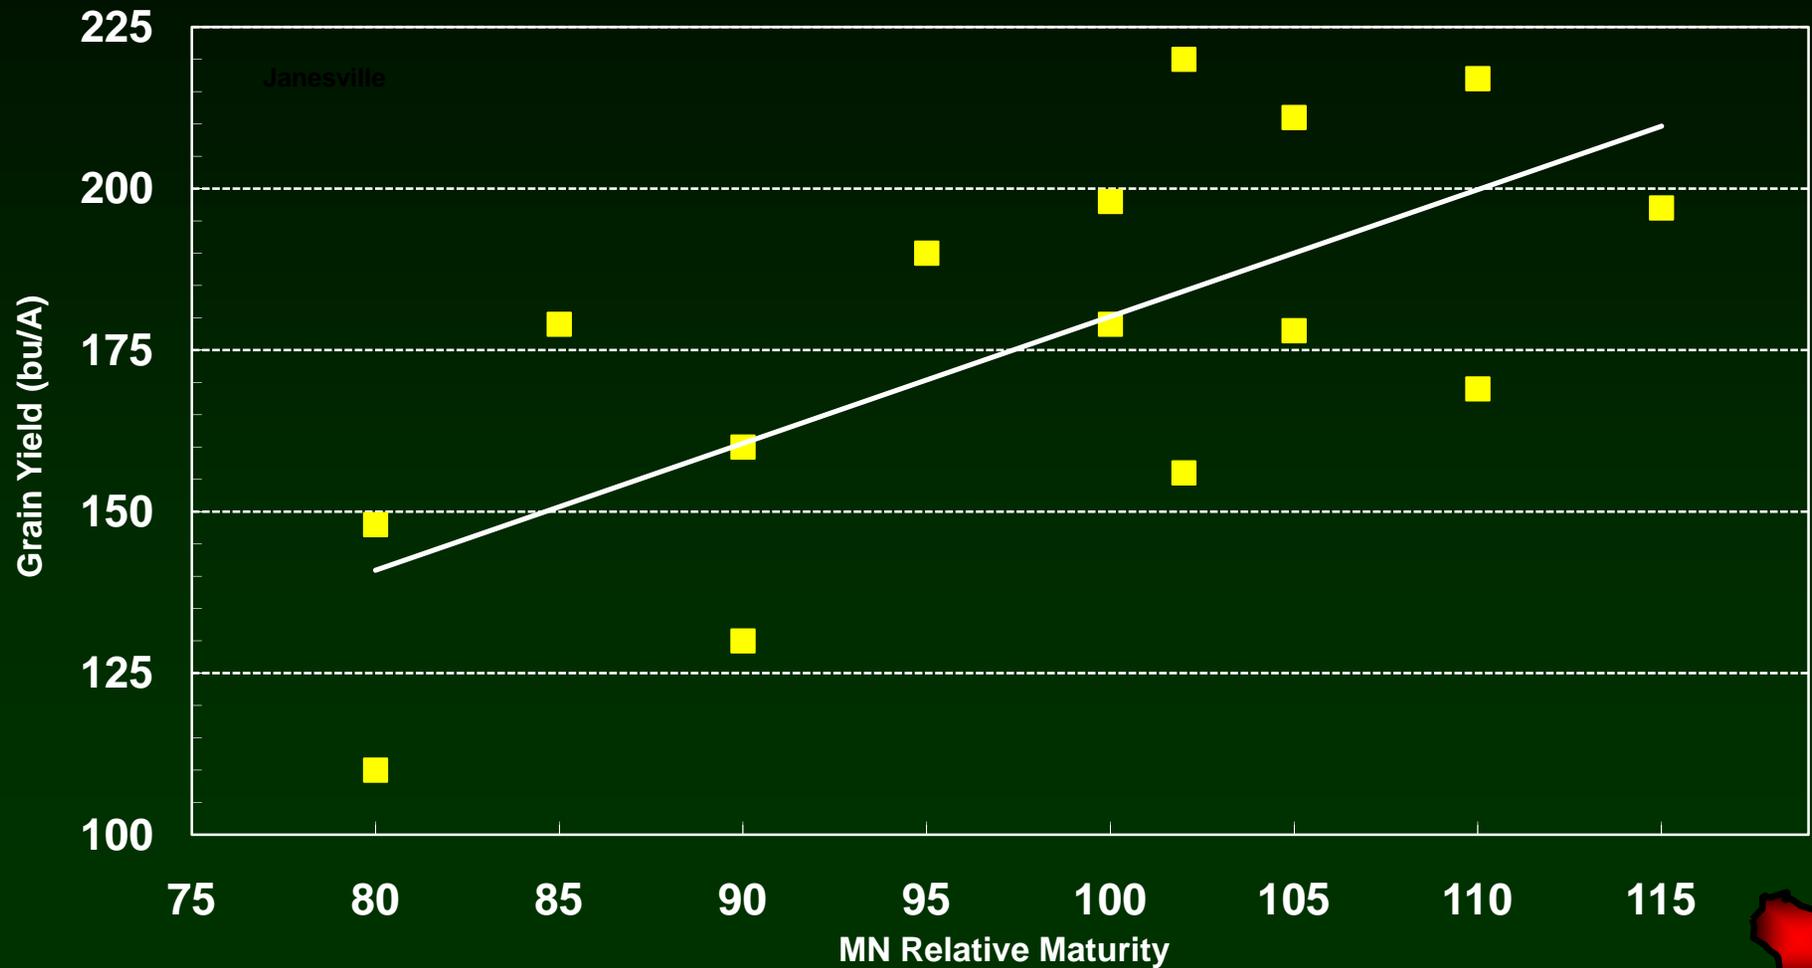

Materials and Methods

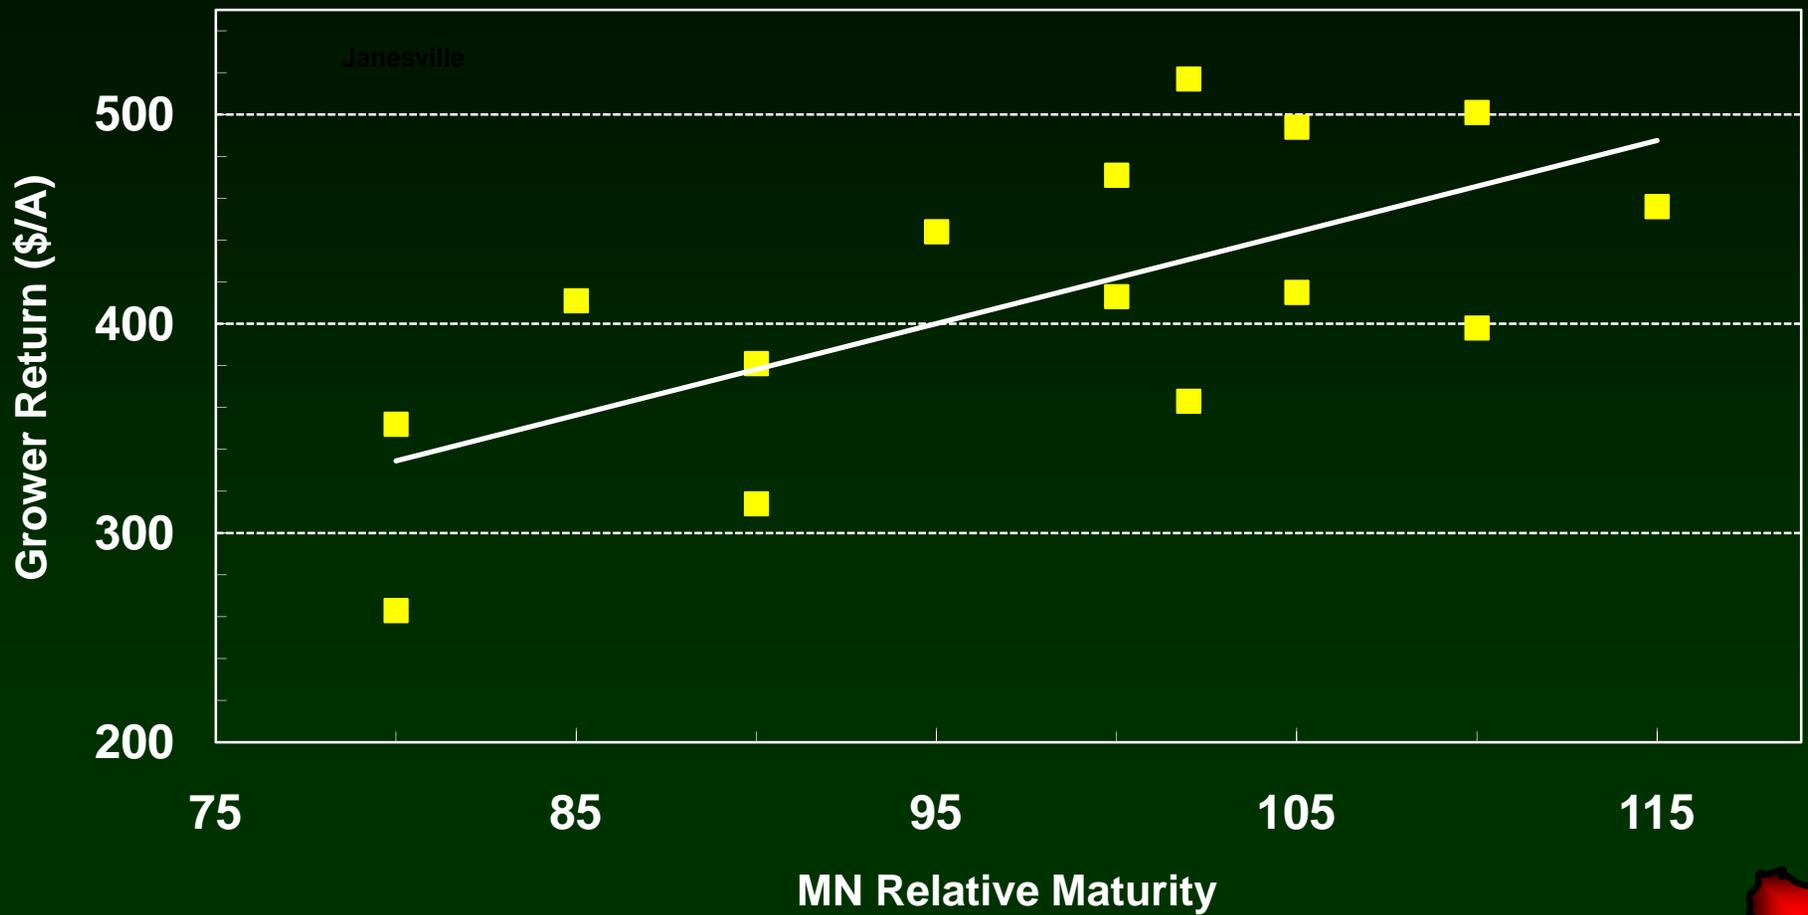

- **Data set**
 - *All hybrid trials conducted between 1973 and 1997 (25 years)*
 - *Used only hybrids that had been tested in MN Relative Maturity rating program*
 - *Optimum management: field selection, planting date, harvest*
- **Corn Price: \$2.00, 2.50, and 3.00**
- **Three corn production systems (drying costs)**
 - *Livestock feeding system (HMC) = \$0.00*
 - *On-Farm drying system = \$0.015 per point bushel*
 - *Commercial elevator drying system = \$0.03 per point bushel*
- **Grower return = (Yield * Price) - Drying costs**

Relationship Between Corn Grain Yield and Minnesota Relative Maturity Rating (1995-1997)

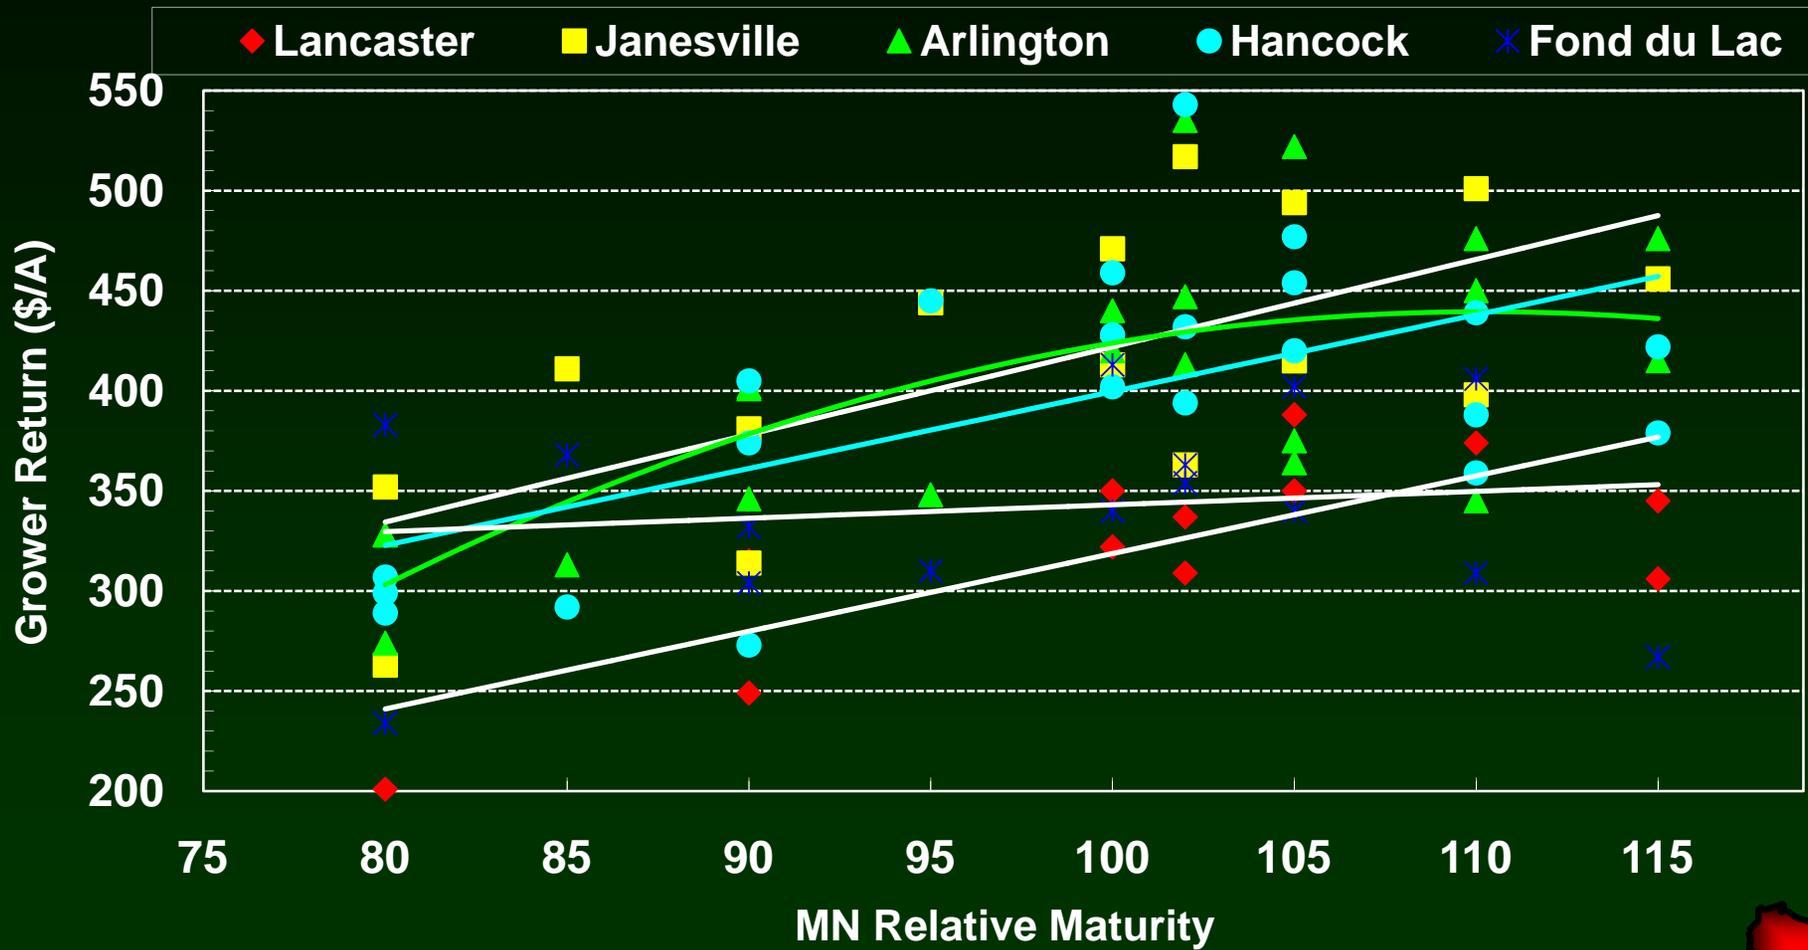

Relationship Between Corn Grower Return and Minnesota Relative Maturity Rating (1995-1997)
